

Custom Home Cinemas

Well designed cinema systems are great showcases for integrated home technology. To provide you with an enjoyable home cinema experience, these systems bring together; superb high definition audio and video, supplemented with great lighting control, and feature ingenious installations that hide away the technology.

Imagine the experience of watching a movie in your own home, with picture and sound to rival the best high street cinemas; along with your choice of food, wine and audience! Or the thrill of playing the latest video game with crisp sound effects, displayed on a nine-foot screen.

At Bristol Home Automation we appreciate that not everyone wants their house to look like a 'bachelor pad', and will work with you to design and install a home cinema experience to perfectly match your individual requirements.

We are experts in ensuring that our installations are hidden within the home, complementing your existing interior decor and architectural style.

As well as discreet packages, we also specialise in dedicated home cinema rooms. From a small converted loft space for an audience of two, to a multi-tiered amphitheatre, we have a solution. By combining authentic cinema seating, distinctive styling and the latest high definition audio/visual technology we can create a magical space for

you and your family to experience many happy hours of outstanding entertainment.
